

FirmataParser.h

```
graph TD; A[FirmataParser.h] --> B[stdint.h]; A --> C[stddef.h]
```

The diagram illustrates the header file dependencies for FirmataParser.h. It is a hierarchical structure where FirmataParser.h is the parent header, and it includes two child headers: stdint.h and stddef.h. The parent header is represented by a grey box, while the child headers are in white boxes. Blue arrows point from the parent to each child, indicating the direction of the include relationship.

stddef.h

stdint.h
